

SMARTCALLER TRUST

SmartCaller Trust is the ultimate solution for outbound callers facing low connection rates due to suspected scam/spam flagging and call blocking by telcos.

Call answer rates have been on a downward trend the past few years largely due to the increasing number of scam, spam, and robocalls. The volume of these calls has caused people to avoid answering the phone if they are not certain who is calling. Compounding this problem are the algorithms telcos use to detect, flag, and block suspicious numbers. Legitimate outbound prospecting and fundraising calls are often mistakenly caught in these detection systems. Solutions used to bypass them, such as regularly swapping numbers, are ultimately ineffective as the concealed filtering systems are constantly changing.

SmartCaller Trust Difference

Rather than play cat-and-mouse with the telecom carriers' filtering algorithms, rely on VanillaSoft SmartCaller Trust to register your phone numbers as legitimate business numbers within the **entire telco ecosystem**. The SmartCaller Trust certification removes ambiguity and prevents the call from being marked as spam or from being blocked. In addition, SmartCaller Trust protects your caller ID branding, ensuring a consistent and accurate display so call recipients are more likely to pick up the first time you call.

HIGHLIGHTS

- Spam tag mitigation
- Caller ID management
- Inbound spoof deterrence
- Monitoring for unusual activity
- Catch attempts to register numbers using your business name
